Dear Ms. Pitcher;

09/8/2011

Permission is granted to use our testimonial on print and internet media.

We have had the pleasure of meeting Dr. Logan and the team of Atlantis EyeCare for the past few months. Our son was born with cataracts in both eyes which we found was from family history and when it appeared his eyes were not going to improve in vision; our family doctor referred us to Atlantis EyeCare.

Dr. Logan's office is very kid-friendly; Staff is wonderful-kind, concerned, and easy to work with. Dr. Logan is not only personable, but a leading expert in the field of pediatric ophthalmology and a cool guy (if memory serves, his children just went off to college!). Our son had been bounced around from one doctor to another prior to knowing Dr. Logan because we were not comfortable with the doctors we were referred to in the past, who not only were unfriendly but quite frankly didn't know how to handle a young child as our son (he is 7 years old). Our first visit occurred a few months ago; Dr. Logan and his team, Lucy and Nicole did a thorough exam, and advised that our son was at a critical stage of his vision and if the cataracts were not removed he would have to wear very thick glasses as his vision would degrade. Surgery was recommended immediately.

Believe me; there is nothing scarier than watching your child being wheeled away to surgery and knowing someone is operating on his eyes...but knowing that someone was Dr. Logan and Atlantis EyeCare made it easier.

Our son's eyes are now progressively getting better and he is very excited. His constant squinting that he had before the surgery that would make it hard for him to do homework and interact with other kids at school is now gone and his vision in my opinion has improved immensely thanks to Dr. Logan and the team at Atlantis EyeCare. Of course being a parent, I needed to check out Dr. Logan and Atlantis EyeCare and found nothing but admirable content online and many happy clients; none have had anything negative to say. They were all overwhelmingly positive; including some parents who were so pleased with their kids' results that they were planning surgery themselves, that would count my wife and soon me with Dr. Logan and the team at Atlantis EyeCare. I highly, highly recommend him should your child need an ophthalmologist.

P.s. Now that my son has greater vision, his homework habits have improved and now I am the one with the visual handicap since now it seems he's always beating me at video games that we play together. Unfair advantage!

Sincerely,

Jorge & Angelica & Michelangelo Goulden
